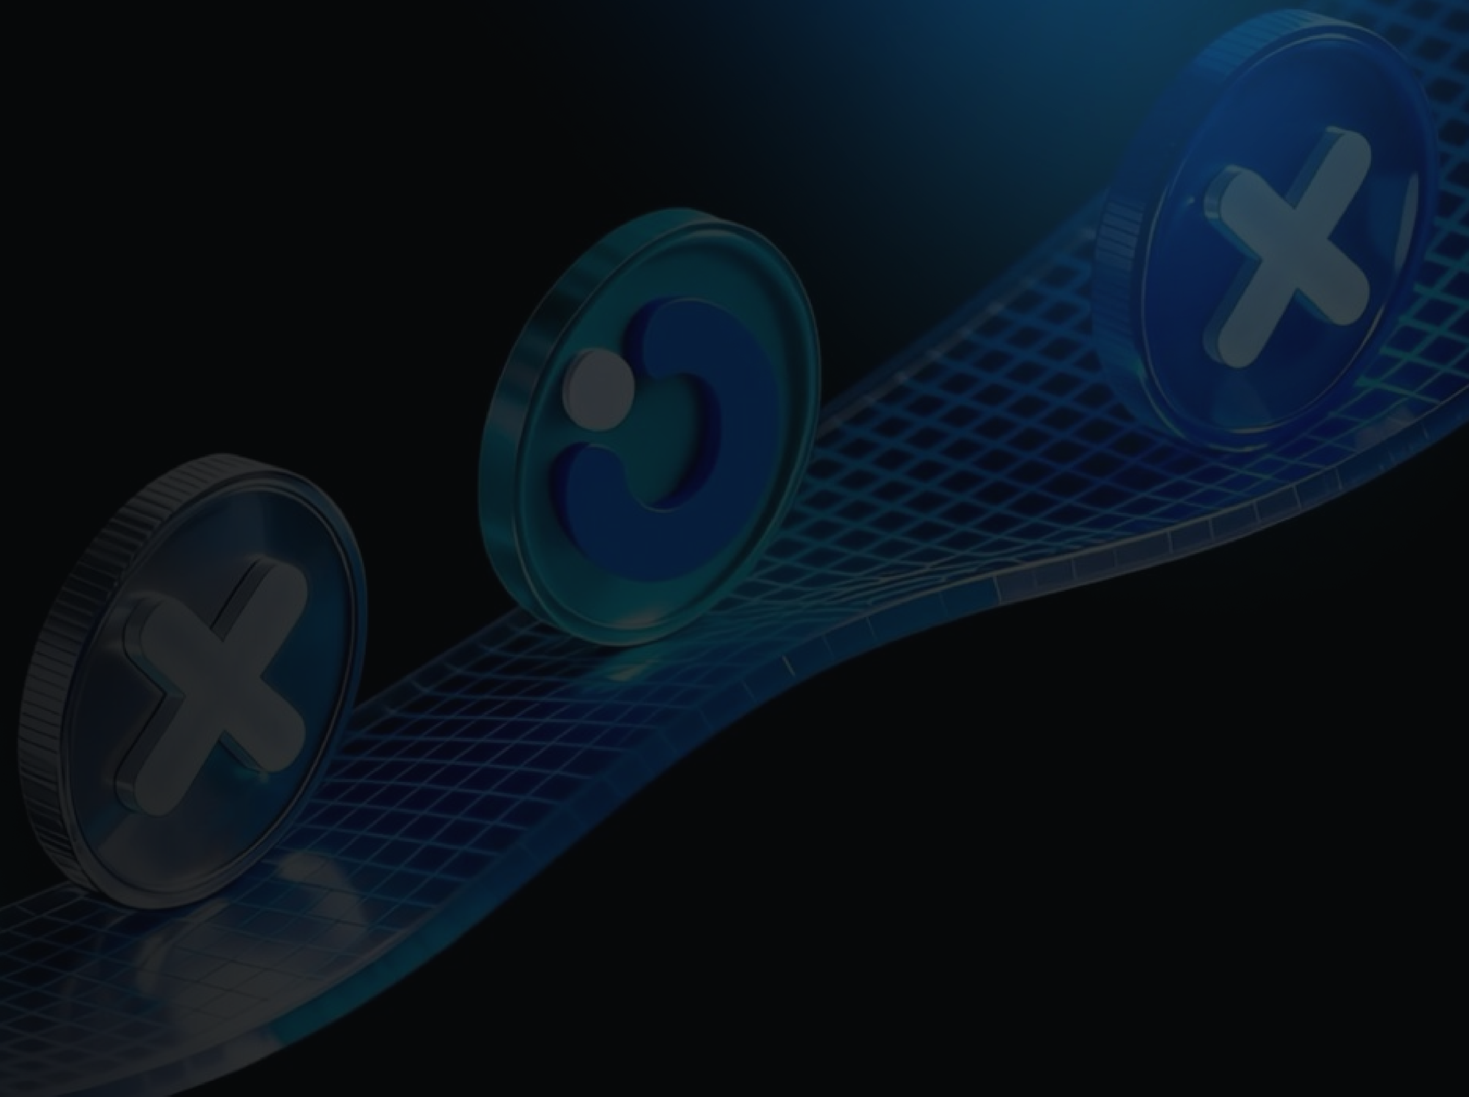
A COMMUNITY-DRIVEN DECENTRALISED EXCHANGE | EASY TO PLAY · FUN TO TRADE

Introduction of XOX (Q3 2026)



Important Notice and Disclaimer

This presentation and its contents are confidential and are being supplied to you solely for your information and may not be reproduced, further distributed or published in whole or in part by any other person. This presentation and its contents are not directed at, and are not intended for distribution to or use by, any person or entity in any jurisdiction or country where such distribution or use would be contrary to applicable laws or regulations. Neither this presentation nor any copy of it may be taken or transmitted into or distributed in any jurisdiction which prohibits the same, except in compliance with applicable laws. Any failure to comply with this restriction may constitute a violation of applicable securities or financial services laws. Recipients are required to inform themselves of, and comply with, all such restrictions or prohibitions, and the Company does not accept liability in relation thereto. By receiving a copy of this presentation, you hereby agree to be bound by the foregoing provisions.

The information in this presentation may be subject to change at any time without notice and should not be construed as a commitment by the Company. The Company assumes no responsibility for any errors that may appear in this presentation.

This presentation relates to a decentralised protocol and software platform, including smart contract-based systems that enable users to interact directly on a peer-to-peer basis. The Company does not take custody of user assets, does not act as a counterparty to any transactions, and does not control or operate user funds. All transactions are executed through smart contracts and blockchain networks, and users are solely responsible for their own wallets, private keys, and trading decisions. Use of the protocol involves technical, financial, and operational risks, including smart contract vulnerabilities, network failures, price volatility, liquidation risk, and the risk of loss of funds.

This presentation may contain forward-looking statements based on the Company's current expectations and assumptions regarding future plans, strategies, market conditions, and technological development. These statements are not guarantees of future performance and involve risks and uncertainties that may cause actual results or outcomes to differ materially. Certain features and products described may not yet be developed and are subject to change. You should not place undue reliance on these statements.

This presentation does not constitute, and shall not be construed as, an offer, solicitation, or recommendation to buy or sell any securities, tokens, or other financial instruments. Nothing in this presentation constitutes investment advice, financial advice, trading advice, or a recommendation to engage in any transaction. Any offer of securities, if made, will be pursuant to definitive legal documentation, including a private placement memorandum or other offering materials. Participation in decentralised protocols and any investment involves substantial risk, including the risk of partial or total loss of funds. Users, contributors, and prospective investors should conduct their own independent due diligence and consult professional advisors before making any decision.

1. THE RISE OF PERPETUAL DEXs

Perpetual DEX Trading Volume (24H)

$22 B

(June 21, 2026)

Total Trading Fee Earnings (Extrapolated on an annual basis)

Hyperliquid	$877.8 m
ASTER	$437.9 m
Lighter	$75.54 m
edgeX	$240.2 m

(June 21, 2026)

Perpetual DEX Trading Volume

Hyperliquid	$237.73 B
ASTER	$61.08 B
Lighter	$44.36 B
edgeX	$37.59 B

(June 21, 2026)

The growth of Perpetual DEXs signals a shift towards decentralised trading, driven by demand for self-custody, transparency, and security

Reference : Defillama

Note : Perpetual DEXs earn revenue by charging maker and taker fees on executed trades

- Makers place limit orders adding liquidity to the order book
- Takers execute existing orders, removing liquidity from the market

2. INTRODUCTION OF XOX

EASY TO PLAY, FUN TO TRADE

A COMMUNITY-DRIVEN DECENTRALISED EXCHANGE

XOX is a community-driven Perpetual DEX built around the idea of making trading easy to play, fun to trade. Designed for crypto-beginner users and stock-market traders entering Web3, XOX combines rich RWA trading opportunities with social and gamified features to create a more engaging trading experience. With seamless self-custody powered by Privy, users can start trading instantly with just one email. Built on a high-performance CLOB model, XOX delivers a fast, institutional-grade trading experience with deep liquidity benchmarked against leading platforms like Hyperliquid.

Community-Driven

- Beginner-friendly social trading through guilds, missions, and rankings
- Create a self-custodial wallet in under 10 seconds with just one email, powered by Privy's secure key management while users retain full control of their funds

Diversified Tradable Markets

- Trade a wide range of crypto pairs with up to 150x leverage
- Trade RWAs across commodities and equities, from gold, silver, and oil to Tesla and selected Asian stocks
- Explore prediction markets that allow users to trade on real-world events

Built for High-Speed Trading

- The CLOB architecture supports up to 200,000 orders per second, delivering deep liquidity and precise price discovery
- The off-chain execution with the on-chain settlement, enabling high-speed trading without compromising security

3. THE RISE OF XOX

Total Registered Users (July 2026)	XOX Total Trading Volume (July 2026)	XOX Peak Daily Trading Volume (July 2026)
5860	$5.1 B	$50.6 M

XOX is rapidly gaining traction, with recent volume growth positioning us among the top 30–50 Perpetual DEXs tracked by CoinGecko and DeFiLlama.

Reference : XOX

4. SELF-CUSTODY

Privy-Powered Self-Custody Access

XOX uses Privy's embedded wallet infrastructure to deliver a self-custodial user experience without compromising ease of access. Users retain wallet-level control through Privy, while XOX does not rely on a traditional internal wallet model to custody user funds.

Public Smart Contract Asset Custody

User deposits are held in the AssetVault smart contract rather than an internal platform wallet. The contract address is public, enabling vault balances and asset movements to be verified on-chain. The vault can only release assets up to the amount it actually holds, preventing any minting or overdraft path.

Protocol-Level Recovery Guarantees

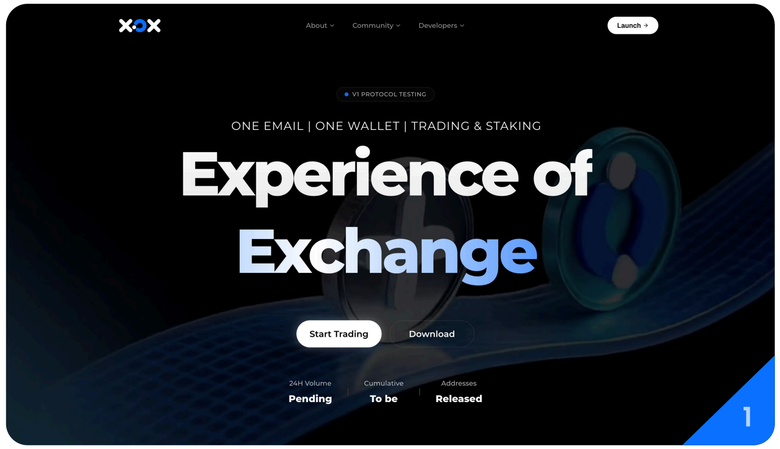
User access and fund recovery are enforced at the protocol level through predefined rules rather than operational discretion, ensuring users retain independent control over asset movement and recovery without reliance on platform permission

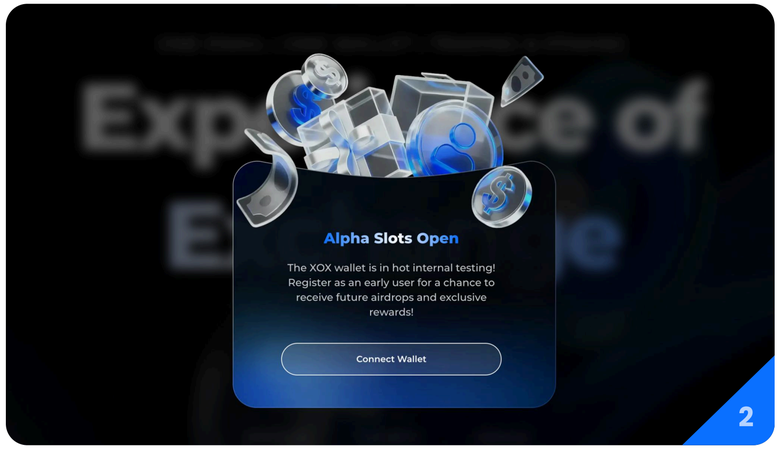
Validators verify data directly against the exchange ledger, without relying on the relayer. If the relayer is compromised and submits a forged request, validators will independently detect the mismatch and refuse to sign.

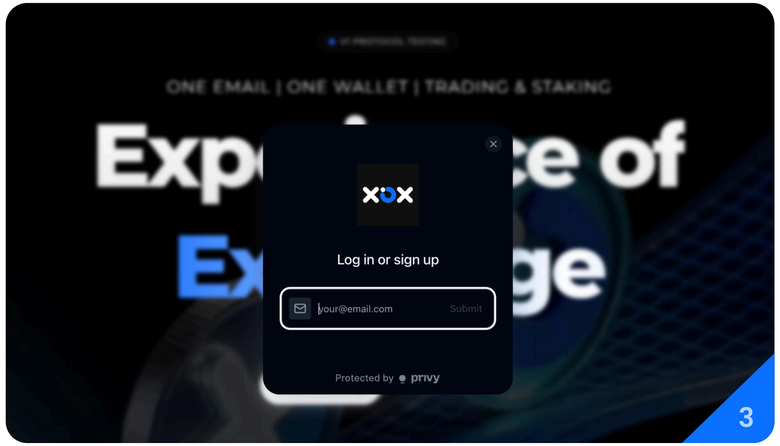
5. ONE EMAIL | ONE WALLET | EASY ONBOARDING

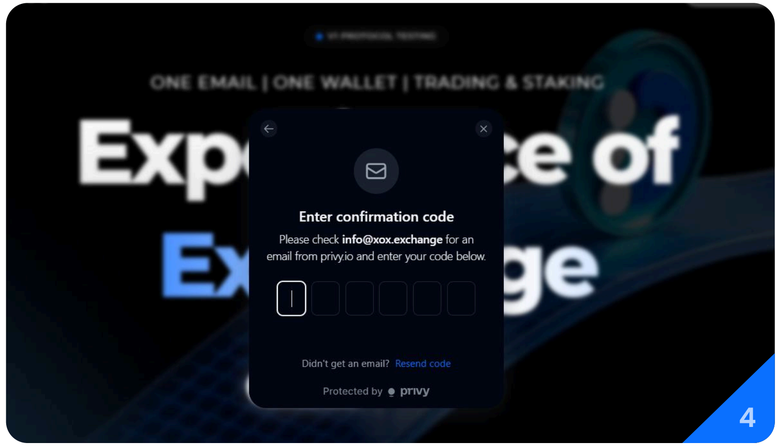
Seamless Web2 to Web3 Transition

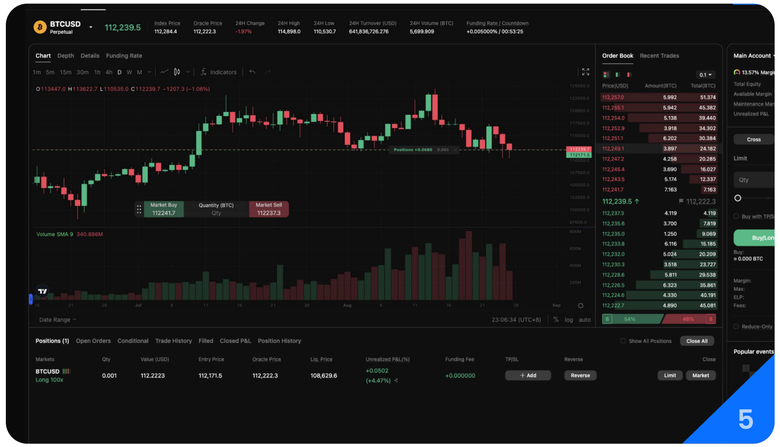
Eliminate the complexity of seed phrases and KYC. Users can instantly create a secure trading wallet with a simple Email & OTP login, making the transition from traditional finance to DeFi effortless and seamless







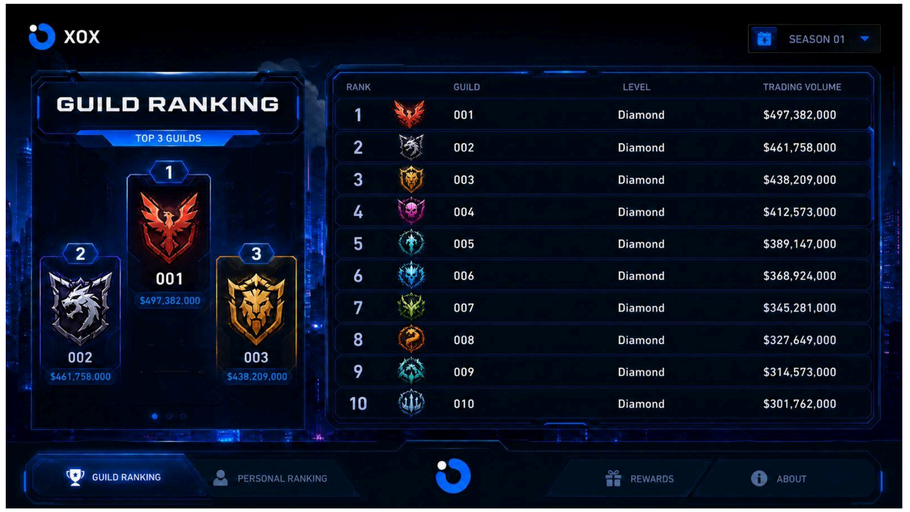




6. COMMUNITY-DRIVEN EXCHANGE

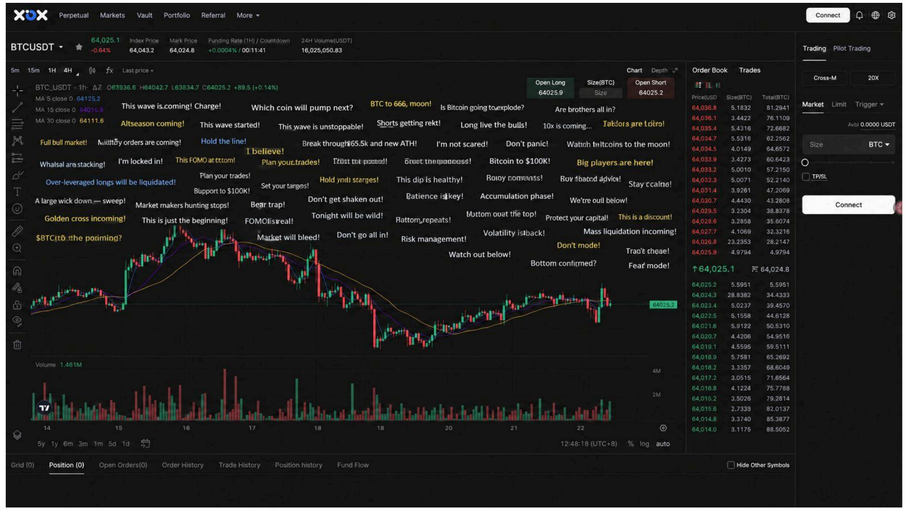
Gamified User Experience

Core features such as guilds and platform missions are designed to make trading more interactive, competitive, and rewarding for users.



Integrated Trading & Interaction

With live trading comments and a forum layer, XOX brings trading and community interaction together in one place, encouraging both engagement and retention.



7. GLOBAL RWA (REAL-WORLD ASSET) PERP MARKETS

Global RWA Coverage

Users can access RWA perp pairs across commodities and global equities, including gold, silver, oil, U.S. stocks, and selected Korean, Taiwanese, and Japanese stocks.

Swiss DLT Framework

Built on Swiss DLT-aligned infrastructure to support transparent settlement, robust risk control, and institutional-grade RWA market access

XOX Tokenized Stock Structure

Underlying Stock Custody

The underlying real stocks are held by a compliant custodian and segregated from the platform's own assets.

1:1 Compliant Token Issuance

Under the Swiss DLT-compliant issuance framework, the underlying stocks are mapped into on-chain compliant tokens.

Example: TSLA → TSLAt

1:1 Wrapping into XOX Stock Tokens

The compliant tokens are deposited into and locked in a wrapping smart contract, then wrapped 1:1 into tradable XOX stock tokens.

Example: TSLAt → TSLAx

On-chain Trading

Users trade the XOX stock token layer on XOX. Pricing references are supported by multi-source price aggregation.

1:1 Redemption

XOX stock tokens can be burned to release the corresponding compliant tokens and complete the redemption process. Wrapping and redemption require KYC / KYB.

Underlying Stock Custody

8. TRADING PLATFORM

Advanced CLOB Model

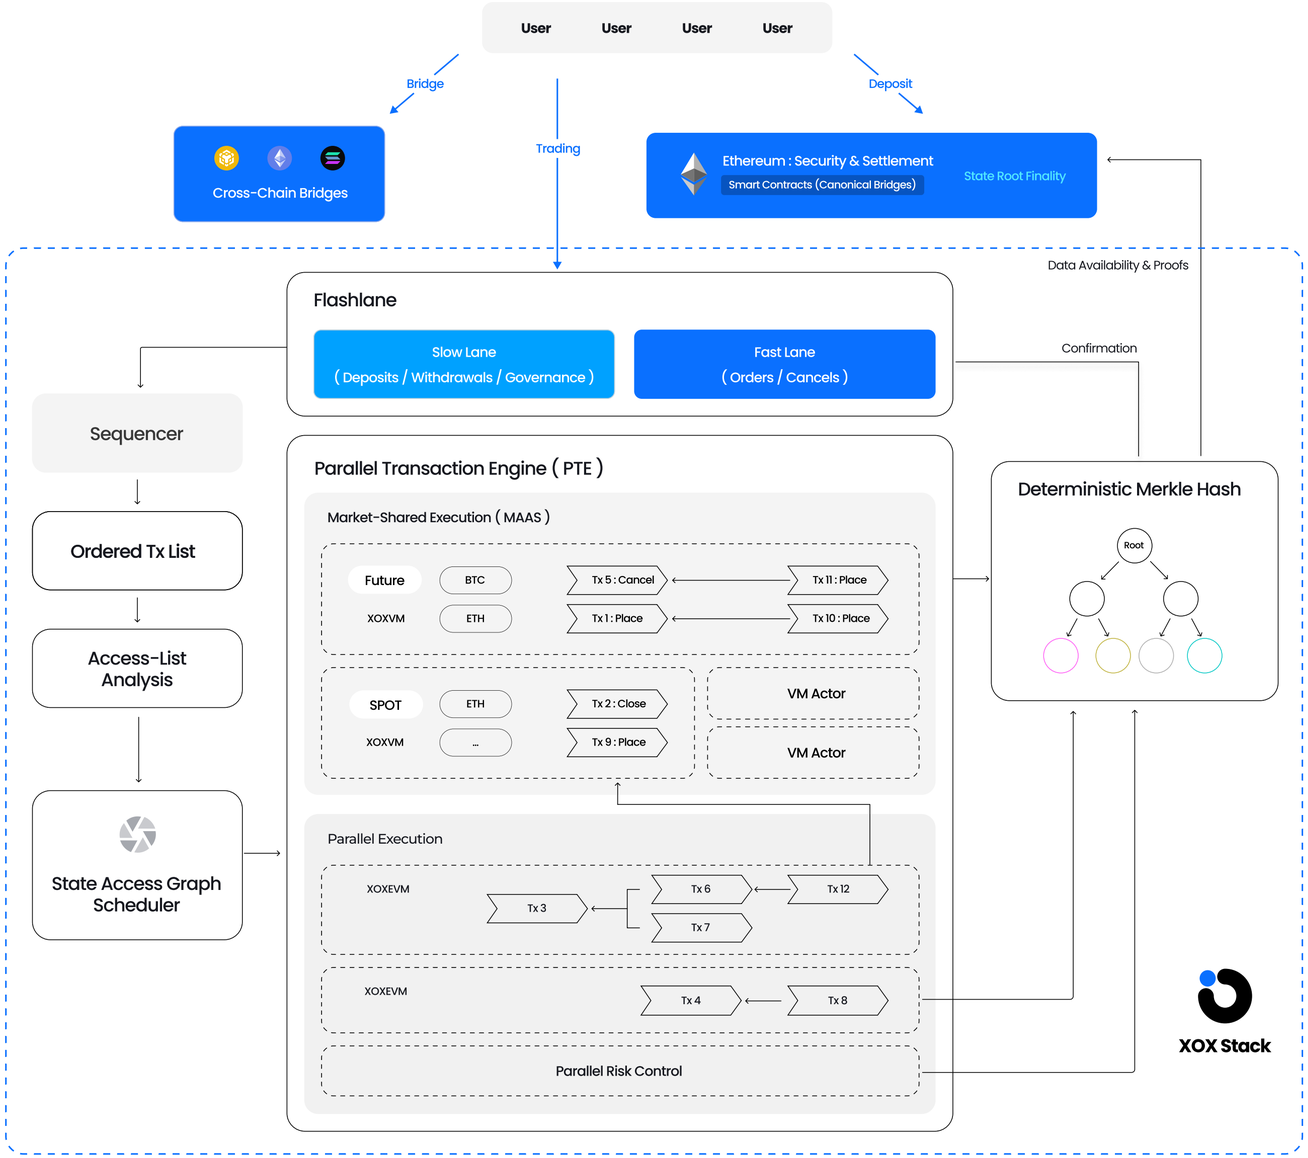
Our Central Limit Order Book provides precise price discovery and deep unified liquidity. It supports professional order types and high-performance APIs, offering a trading experience far superior to traditional AMMs

CEX-Level Trading Experience

Enjoy the seamless user experience of a Centralised Exchange with the security of a Decentralised Exchange. By matching orders off-chain and settling on-chain, XOX delivers professional-grade tools without compromising on asset transparency or user control

Deterministic State Commitments & Verifiability

All executed transactions are aggregated into deterministic Merkle roots, ensuring that state transitions are reproducible, auditable, and verifiable



9. DEX TOKEN

Platform Token Appreciation

19 x

Hyperliquid’s Governance Token

HYPE Price Performance from TGE to All-Time High (May 2026)

Reference : CoinMarketCap

43 x

Backpack’s Governance Token

5%
Treasury

1,000,000,000
Total Supply of XOX Token

11. FUNDRAISING TERMS & ALLOCATION

Capital Raised

$6 M

This is expected to be our only fundraising round before full platform launch.

Token Issue Price

$0.03

Implied Valuation

$30 M

Token Allocation

20%

Based on platform revenue and the planned revenue-backed token support mechanism, we estimate a potential 22% upside from today's implied valuation.

12. REVENUE MODEL & BUSINESS ECONOMICS

Trading Fees

Transaction fees generated from perpetual trading activity, including maker and taker fees, designed to scale with trading volume and market volatility

Listing Revenue

Fees charged to projects for listing their tokens or markets on the platform, providing visibility, liquidity access, and distribution to an active trading user base

API Services

Recurring revenue generated by providing institutional-grade trading and market data APIs to external platforms and applications, similar to a data and execution infrastructure service

Strategy X Vaults

Performance-based fees and liquidation-related revenues generated from strategy vaults that deploy on-chain capital to capture funding rates, volatilities, and trading inefficiencies

Launch Fee

Fees collected from creators and teams launching memecoins or tokens through the platform's launchpad, including token issuance, initial liquidity setup, and go-to-market support

Copy Trading Fee

Fees generated from copy trading activity, including performance-based fees from lead traders, platform service fees, and revenue shared from follower trading volume executed through the platform

13. BUILT FOR PARTNERS. DESIGNED TO REWARD

Lower Barriers & Simpler Requirements

$5,000,000
Trading Volume Requirement
within a 60-day period

0

Users Required

$5,000
Minimum Contribution
(Pre-TGE DEX Token)

Performance-Based Rewards

Up To
33%+
Platform Token Fee Discounts

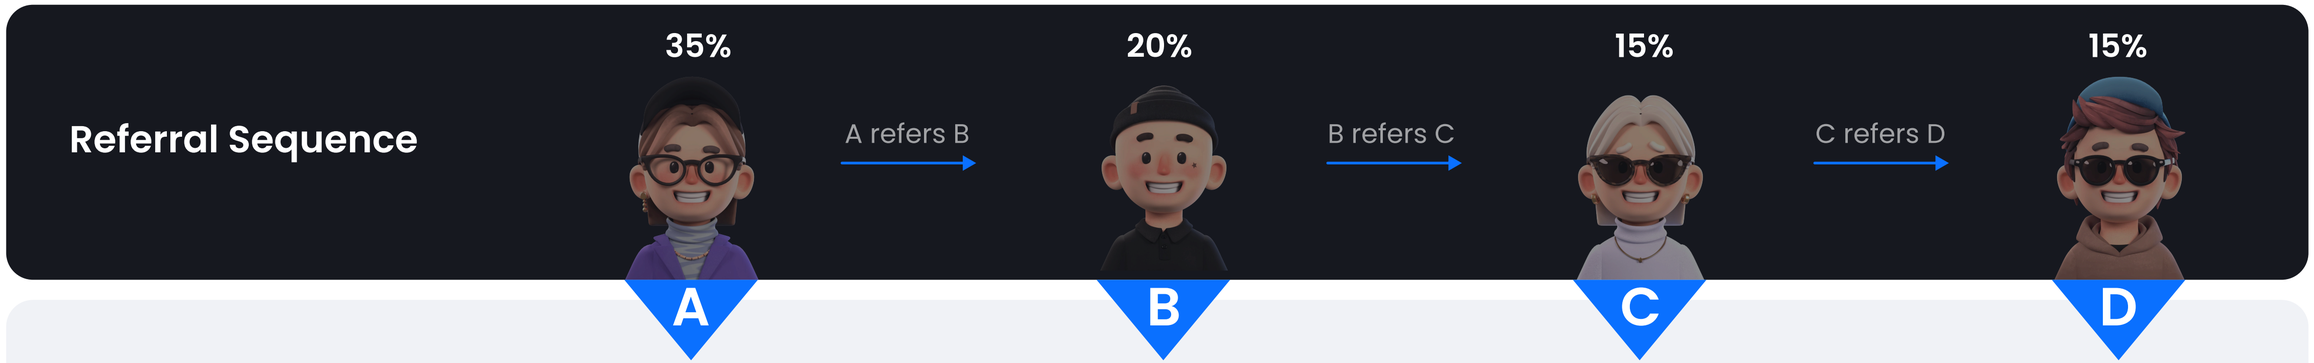
Earn Points Up to
1.4x
Faster

Up to
50%
Trading Fee Rebates

A top-tier partner with 30 clients who meet 25M trading volume thresholds can earn $3,744,000+ in annual rebates

14. AFFILIATE REBATE STRUCTURE

Referral rewards are **not limited to a fixed number of layers**. Any upstream referrer may earn an override as long as their assigned rebate percentage is higher than the downstream rebate percentage, with the reward calculated based on the percentage difference between the two levels.



15

35% (A) - 20%(B) = 15%

5

20%(B) - 15%(C) = 5%

0

15%(C) - 15%(D) = 0%

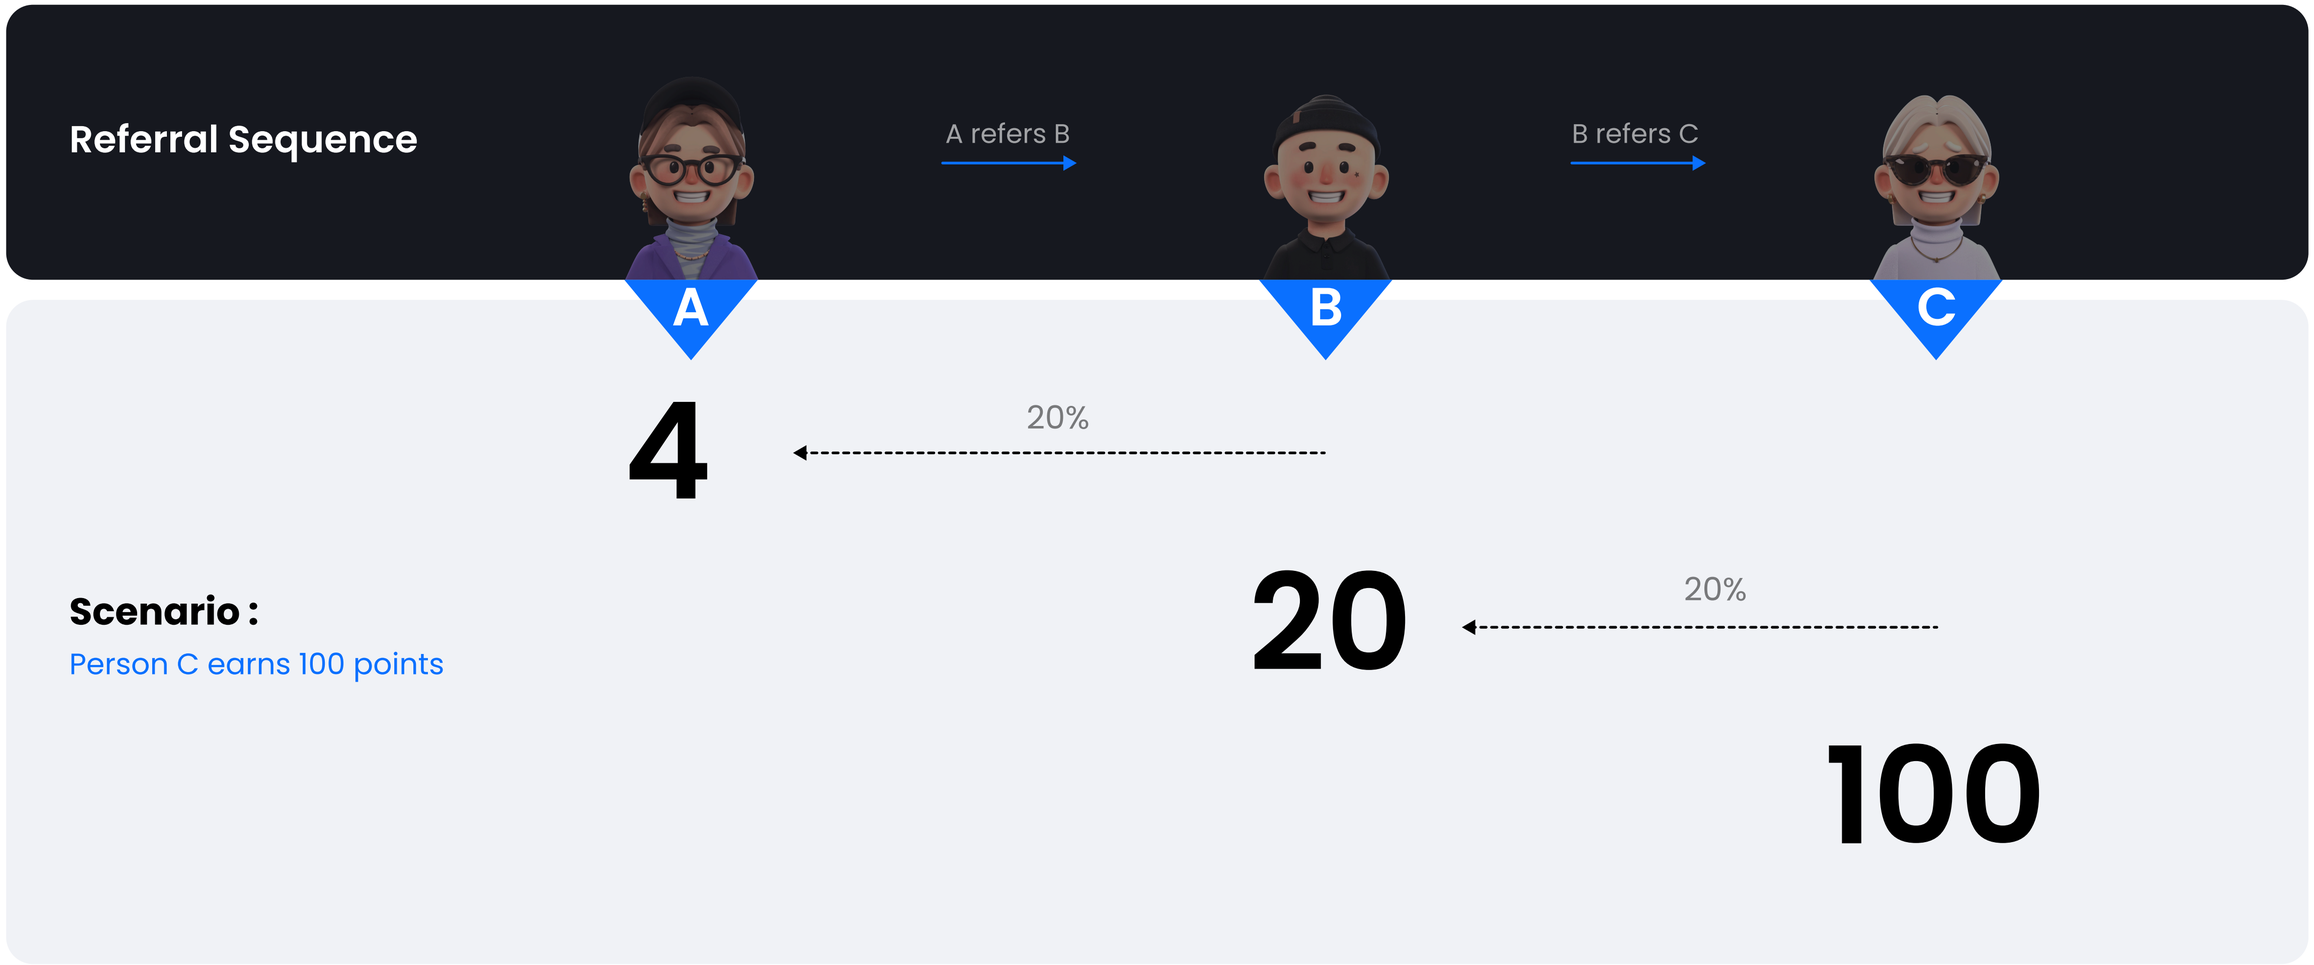
100

Scenario :

Person D earns 100 rebate

15. AFFILIATE POINTS STRUCTURE

Referrers can earn 20% of their referee's points across up to 3 referral layers. In the example below, A is the last layer eligible to earn 20% of the points, while the user who referred A will not receive any points generated by D.



16. XOX 24-MONTH DAILY TRADERS GROWTH STRATEGY

Key Growth Drivers

- **Multi-Product Engagement Loop**
- **Low-Friction Onboarding**
- **Affiliate & Creator Distribution**

Note : All market predictions and growth forecasts are derived from DefiLlama's aggregate historical data for the Perpetual DEX sector

17. XOX 24-MONTH TRADING VOLUME GROWTH STRATEGY

Key Growth Drivers

- **Fee Structure & Rebates**
- **Copy Trading & Whale Following**
- **Product Expansion into New Markets**

Note : All market predictions and growth forecasts are derived from DefiLlama's aggregate historical data for the Perpetual DEX sector

18. ROADMAP

Jun. 2026

Platform Beta

XOX enters a controlled beta phase, opening access to selected users and partners to test the core trading experience.

Aug. 2026

Platform Launch

Core trading engine goes live with self-custody capability and aggressive incentive structures

Jan. 2027

Trading Competitions & Copy Trading Ecosystem

Integrated trading competitions and self-custodial copy trading, fostering performance-driven engagement, rankings, and a vibrant social trading ecosystem

Jul. 2027

Creator Coin Launchpad

Enable creators and KOLs to issue tokens with platform-supported liquidity channels

Jul. 2026

Prediction Market

Introduce event-driven prediction markets, enhancing trading depth and narrative participation

Oct. 2026

Strategy X Vaults

Launch xLP and strategy vaults, enabling on-chain capital deployment and passive yield models

May 2027

Meme Layer Activation

Launch meme layer tied to usage, deposits, referrals and cultural identity

Sept. 2027

TGE

Token Generation Event (TGE) with ecosystem expansion, strategic partners, and valuation driven market positioning
